RCS: the behavioral finding

Investigation Summary, Intake 194932 / CD 65963

Investigation: September 30, 2025 | Original PDF page 2, item 5

SOURCE IMAGE: selected lines only; surrounding material omitted for privacy and scope.

5. Interviews showed that there has been no witnessed irrational behavior from the providers. No facility failed practice was identified.

What this establishes

This selection shows the behavioral finding and its associated outcome. The investigation recorded no citation. It is not a clinical assessment or a determination about every separate or historical allegation.

WABON: the nursing complaint closure

Case 2025-17807RN | Complaint Closure communication

March 17, 2026 | Original redacted packet PDF page 8

SOURCE IMAGE: selected lines only; surrounding material omitted for privacy and scope.

The Washington State Board of Nursing received a complaint against your nursing license. The allegation was exploiting a patient for financial gain. WABON closed the complaint without investigation because the allegation is found to be below threshold according to WABON procedure as a nursing violation was not identified. Complaint Process | Washington State Board of Nursing

What this establishes

The closure was a threshold screening decision without investigation. This excerpt does not identify the reporter, establish the original complaint date, or connect the matter to the September RCS complaint.
